## **Amendments to the Claims:**

The listing of claims will replace all prior versions and listings of claims in the application:

## **Listing of Claims:**

Claim 1 (Original) A suspension antiperspirant aerosol composition comprising milled activated aluminium chlorohydrate (AACH) having non-hollow particles and a carrier fluid comprising a masking oil of viscosity 10<sup>3</sup> mm<sup>2</sup>/s or greater.

Claim 2 (Original) An aerosol composition according to claim 1, wherein the AACH is present at a level of from 1% to 30% by weight of the composition.

Claim 3 (Original) An aerosol composition according to claim 2 wherein the AACH is present at a level of from 2% to 5% by weight of the composition.

Claim 4 (Currently Amended) An aerosol composition according to any of the preceding claims 1, wherein the masking oil has a viscosity of 30,000 mm<sup>2</sup>/s or greater.

Claim 5 (Currently Amended) An aerosol composition according to any of the preceding claims 1, wherein the AACH has a continuous RI.

Claim 6 (Currently Amended) An aerosol composition according to any of the preceding claims claim 1, wherein the masking oil has an RI of 1.40 to 1.57.

Claim 8-7 (Currently Amended) An aerosol composition according to claim 6, wherein the masking oil is a silicone oil.

Claim 9–8 (Currently Amended) An aerosol composition according to any of the preceding claims claim 1, comprising an additional emollient oil.

Claim <u>10–9</u> (Currently Amended) An aerosol composition according to <del>any of the preceding claims</del> claim <u>1</u>, comprising a bulking or suspending agent.

Claim <u>11–10</u> (Currently Amended) An aerosol composition according to <del>any of the preceding claims claim 1, comprising a volatile silicone.</del>

Claim <u>12–11</u> (Currently Amended) An aerosol composition according to <del>any of the preseding claims</del> claim 1, comprising a propellant gas.

Claim <u>13–12</u> (Currently Amended) An aerosol composition according to claim <u>121</u>, wherein the propellant gas is a liquefied gas at a level of from 5 to 95% by weight of the composition.

Claim 14—13 (Currently Amended) A method of manufacture of a suspension antiperspirant aerosol composition, said method comprising the suspension of a milled activated aluminium chlorohydrate (AACH) having non-hollow particles in a carrier fluid comprising a masking oil of viscosity 10<sup>3</sup> mm<sup>2</sup>/s or greater.

Claim 45–14 (Currently Amended) A method of reducing perspiration and giving low visible deposits comprising the application to the human body of a suspension antiperspirant aerosol composition comprising milled AACH having non-hollow particles and a carrier fluid comprising a masking oil of viscosity 10<sup>3</sup> mm<sup>2</sup>/s or greater.
